

Dear Transplant Recipient:

My brother was 49 years old, surprised us when we found out he was an organ donor in the hospital.

He was well loved by family, friends, and strangers alike. He loved music, movies, and sports. We always had pets growing up, he was a big animal lover.

My family is very proud of his decision to donate! It would make my heart happy to meet, even if it's just being a pen pal to the person he helped live a better life.

- Regards Donor family
