

Dear Transplant Recipient:

My sister-in-law is the one who donated her cornea. She was 52.

This was a very sudden and unexpected passing. We have all taken it very hard as you can imagine, but are beyond thrilled that her cornea was able to help you.

She had a kind and gentle soul and a heart of gold. She loved to help others and would always put herself last. We are so very happy and proud that she may have helped you. We look at it as if we were seeing her through your eyes. I know this is hard especially for her partner, my sister and their son.

I hope you are doing well and can see the world in a whole new light. I wish you the best! Thank you so much,

- Regards Donor family
