

Dear Donor Family:

I want to express my gratitude for the gift of a cornea transplant tissue I recently received from your family member.

I am a 69-year-old with numerous eyesight issues. The new cornea tissue should provide me with stable and improved vision. The DSAK procedure uses layers of the cornea to replace failing cornea tissue. Being semi-retired, good eyesight is important to me in my chosen profession, television production. I also still teach part time at the college level. Your gift will allow me to continue enjoying my hobbies, photography, video, and birding. In fact, I just purchased a new camera to allow me to expand on the hobbies.

Again, thank you for the tissue donation. Your gift to me will always be appreciated.

-Grateful Recipient
